11) The scheme of water supply to Anekal town has been duly sanctioned for Rs 18,338 by the Chief Engineer PWD vide his No 287 dated 21/9/42. He recommends sanction of the scheme from out of the Water Supply allotment for the current year, the remaining amount of Rs 3338 being met out of the savings in the Subscription Collected for the purpose

Water Supply scheme for Anuradhapura
1694/2

File No 70 of 194 | General and Revenue Secretariat

Serial No

The proposals of the Dy Comm are submitted for orders

Gd 10/12
GS 10/12

Anuradhapura is a Municipal Council. Its financial position according to the sanctioned budget for 1942-43 is as follows

Total income Rs 13,652 Normal income Rs 10,570
Total Expenditure Rs 12,441 Normal Expenditure Rs 10,791
Closing balance is Rs 1,041

(3) Its financial position is therefore not sound. It has another arrears of taxes to collect to the extent of Rs 8061/- according to the D.C.'s statement for the quarter ended 30.9.1942

1) The estimate for the improvements water supply is Rs 18,338/- This has been duly scrutinized by the Chief Engineer

The Municipal Council is prepared to pay a subsidy of Rs 3338/- out of the savings available to provide subscriptions raised on this connection

The D.C. recommends that the balance of Rs 15,000/- may be paid by Govt out of the water supply grants for 1942-43

This request is for orders

Generally half the estimated cost is met by the Local Body concerned. This

Anekal water supply & Drainage scheme

Continuation Sheet — File No / Current No 70 of 41 Page

would come up to Rs 9169/- Excluding the sum of Rs 3000/- available out of the public subscriptions, the amount which the MCC would have to contribute would be Rs 6169/- If the arrears of taxes to be collected should perhaps create an embarrassment if such a large amount of Rs 10000/- is given by the Govt. If approved the D.C Bangalore will be requested to suggest to the MCC that it might take a loan of Rs 6000/- from the Govt to meet its portion of the cost the period of repayment the rate of interest & the source earmarked for repayment will have to be settled when Sanction to the loan the power of the MCC may also be called for under rule

After receipt of these particulars the question of sanction of the scheme & the estimate may perhaps be considered

Under rule suppose

Sanction of 11/12 Lacs

19) The Council has to take a loan & conclude it as the accounts The Council may be suggested to apply for a loan of Rs 6000/-

Sir,

As per telephone message received on the 1st August 1941 I have the honour to enclose herewith Notes on the following

1 Water Supply arrangement in Anekal, Hosakote and Doddaballapur

2 Infor ation regarding grants given to the above three places for the last five years

3 Information as to what arrangements have been made for other important works for which town improvement grants have been sanctioned

As regards item No 2, a sum of Rs 2,275/- h s been sanctioned for conversion of petta chowk into a circle at Doddaballapur and a sum of Rs 1,000/- has been sanctioned for the construction and improvement of Bus stand at Hosakote These works were not executed by the Bureau of Sanitary Engineering

I have the honour to be,

Sir,

Your most obedient servant,

Director of Public Health

Notes 5/8/41

A Note on Dodballapur Water Supply

Five borewells have been put down at Dodballapur in connection with the water supply to the town and power pumps have been installed on two wells But since the yield from the second well was found to be brackish and bacteriologically impure t e town has so far been fed with water from only one borewell. This well was originally yielding 4,000 gallons an hour but owing to the failure of the monsoon the yield has now been reduced to about 3,000 gallons an hour.

An estimate amounting to Rs 4,445/- for shifting the existing pump from No.2 borewell, which has been abandoned, to No 5 borewell has been sanctioned in Government Order No L 7477-79/M1 54-40-16, dated April 18, 1941 and the work is in progress When this work is completed it would be possible to supply the town with another 2,000 gallons an hour from o.5 borewell The work of the installation of the pump is held up for went of receipt of pipes from Bhadravathi. At the same time the estimate has been revised providing current rates for materials and the amount of the revised estimate has exceeded the sanctioned one by Rs 800/- and the same is being forwarded to the President of the Municipality for provision of the extra funds required to complete the same

Regarding the maintenance charges of the water supply a balance of Rs 13,317.10 9 is due from the Municipality at the end of the year 1940-41 and the D.C.B statement from the year 1936-37 is enclosed herein.

D.C.B Statement relating to Annual Maintenance of Doddaballapur Water Works for the last 5 years.

Years	Opening Balance to end of June 1936	Debits Rs	Total Rs	Credits Rs	Balance Rs
1936-37	550 10 9	2,754 9 7	3,305 4 4	805 14 11	2,499 5 5
1937-38	2,499 5 5	3,101 6 8	5,600 12 1	1,045 11 0	4,555 1 1
1938-39	4,555 1 1	3,289 5 1	7,844 6 2	...	7,844 6 2
1939-40	7,844 6 2	3,494 15 8	11,339 5 10	...	11,339 5 10
1940-41	11,339 5 10	2,978 4 11	14,317 10 9	1,000 0 0	13,317 10 9

A Note on Dodballapur Drainage.

An estimate amounting to Rs 88,380/- for providing surface drains with necessary treatment works has been sanctioned by Government. The first two stages of the work have been completed and the third stage is under execution during the present year The amount of the estimate and Government grant for these are noted below:

I Stage:	Amount of Estimate		Rs.6,250/-
	Government grant:	1936-37 .	" 1,500/-
		1937-38 ..	" 2,000/-
II Stage:	Amount of Estimate	.	Rs 12,700/-
	Government grant:	1938-39 ..	" 6,350/-
III Stage:	Amount of Estimate	..	Rs 5,440/-
	Government Grant	.	Nil

A Note on Hoskote Water Supply

Water supply to Hoskote town is drawn from an ordinary well sunk beside the Hoskote tank Water from this is lifted into an elevated reservoir constructed at the highest point of the town The works were completed during 1938-39 The amount of the estimate is Rs 24,100/-

Govt Grant:

	Rs.
36-37	8,720
38-39	3,300

Just at present on account of the inflow into the well being very low it has been found necessary to stop the pump every hour in order to allow enough of water to percolate into the well; and with this intermittent pumping it has not been possible to meet the requirements of the water supply of the town satisfactorily.

The well is 40' deep and the lowest 15' of water cannot be lifted with the pump installed in its present position in order to be able to draw all the water from the well. It would be necessary to lower the pump by another 15' and estimate amounting to Rs.1,400/- for putting down a subsidiary well 19' deep to locate the existing pump therein and also providing for a roofing over the latter was forwarded to the Municipality for their countersignature and providing funds in this office letter No 43 dated July 5, 1941 The proposal and the present well were inspected in company with the President and some of the Municipal Councillors and they are convinced of the necessity of executing this work in order to be able to take full advantage of the existing well the President promised to return the estimate with necessary countersignature and funds. But so far the estimate is not received back

Re: Drainage of Hoskote Town.

An estimate amounting to Rs.42,500/- for providing surface drains of the silk pattern type has been prepared and submitted to the Director of Public Health in Mysore, Bangalore, recently and the same is forwarded to D.C Bangalore in March 41

A Note on Anekal Water Supply

Five borewells have been put down in connection with the water supply to this town and three of them give yields of 630, 750 and 1,200 gallons per hour respectively The others yield less. A scheme amounting to Rs.14,700/- has been forwarded to the Municipal Council, in May 1930 for water supply to the town from a borewell But the estimate is not sanctioned and no further action has been taken.

The estimate for Rs 14,700/- provides for a distribution system and public fountains also and at the present market rate the cost is likely to go much higher If, however, the Local Body would be satisfied with a few taps beside the elevated tank that may be installed close to the well, it may be possible to execute this work at a much less cost. The maintenance charges will be about Rs 1,000/- a year even for the restricted supply.

A Note on Water Supply to Devanhalli.

There are two borewells in the town, one near the T.B. which is 150 ft. deep and is yielding about 600 gallons of water per hour, and the other 165 ft deep and yielding only 300 gallons per hour.

The population of the town being about 7,000 the yield from the above two borewells, will not be sufficient to supply water to the whole town. It was therefore proposed to sink another borewell below Gopalakrishna Tank Bund (Major Tank), where the underground water ~~in this locality~~ was expected to be adequate, as was seen from the yield in the open wells put down for irrigation in this area. The President, Municipal Council, Devanhalli, was addressed in this office letter No.4224 dated 5th February 1940 to place a sum of Rs.1,000/- at the disposal of this office for sinking a borewell below the Gopalakrishna Tank Bund. No reply has been received from him so far.

It is also suggested that the first borewell which is yielding about 600 gallons per hour, and which is also close to the shandy maidan, T.B. and Electric Colory and Adikarnataka Colony, may be harnessed by the installation of a power plant and 4 taps installed, one in Shandy maidan, one for the electric colony, one in the T.B. and another for the Hospital quarters, where it is said that the scarcity for the drinking water was keenly felt. The estimate for this scheme estimated at Rs.4,400/- has also been forwarded to the Deputy Commissioner, Bangalore District.

A complete note on the scheme of water supply to Devanhalli town has been forwarded to the Deputy Commissioner, Bangalore District, in this office letter No.1654 dated 2/4th May 1941.

A reply is due from the DC Bangalore to the Director of Public Health

Sir,

Subject Water supply scheme to Anekal Town-
forwards revised estimate for sanction

With reference to your letter No. L 6743-Ml 70-41-8 dated 4-2-1942 on the above subject, I have the honour to state as follows

2 An estimate for Rs 14740/- was prepared during the year 1935-36 for the supply of water to Anekal Town by means of borewells The estimated cost included the cost of sinking bore wells The public were very eager to have the facilities of protected water supply scheme to their own As the Municipality was not capable of financing the scheme, public subscriptionsxwere raised, as a result of which a sum of Rs 7745-2-5 was collected Five bore wells were sunk by the Sanitary Engineering Department of which 3 are yielding a good supply of water viz , 630,750, and 1200 Gallons per hour respectively A sum of Rupees Four thousand and odd was spent on sinking these bore wells out of the public subscriptions raised A recommendation was made to Government in this office letter of even number dated 18-12-1936 (copy enclosed) for the sanction of the scheme by granting half of the

estimated cost out of the Town Water Supply Grants since the public have readily responded and collected the remaining half of the estimated cost The connected estimate and plan had also been sent along with letter quoted above No orders were passed on this recommendation till now and the water supply question as at a standstill The bore wells sunk at a heavy cost were thus left without operations

3 The Municipality requested for a grant from Government to push through the scheme and this item was being included every year under the proposals for Town Water Supply grants During the year 1940-41, the Sanitary Engineer, intimated that the estimated cost for completion of the water supply scheme might come to more than Rs 25,000/- due to the abnormal rise in the prices of materials on account of war conditions No further action could be taken on account of this prohibitive cost of the scheme The public were however repeatedly agitating for the fulfilment of water supply scheme for which they had liberally contributed

4 After protracted correspondence, the Sanitary Engineer has now sent up an estimate for Rs 18,338/- for a modest scheme of watersupply This scheme provides for installing a deep well pump to the second bore well to pump water to a suction well near the next bore well A temporary masonry reservoir of 750 gallons capacity is proposed to be constructed from where water is proposed to be supplied through 6 public taps constructed nearby The detailed estimates, report,plans and the copy of the Sanitary Engineer's letter No 223 dated 14-8-1942 are herein enclosed for favour of reference The Municipal Council at first resolved at their meeting held on 5-1-42 that it ~~was~~ no good installing a few taps near the overhead tank itself, and requested for the supply of water by means of taps through pipes in the interior parts of the town But the Sanitary Engineer opines ~~in remand~~ that a proper scheme with 10 taps to command the

several localities of the town would cost not less than Rs 50,000/- at the present abnormal rates of prices of the materials and particularly galvanised iron pipes Thus if the opinion of the Municipal Council is to prevail, there will be no chance of taking up the scheme in the near future on account of its prohibitive cost The Sanitary Engineer further states that the present scheme if taken up would serve as a foundation for future improvements when better conditions prevail

5 The Municipal Council were suitably advised and they have resolved at their meeting held on 27-8-1942 that the present scheme may be taken up Regarding the cost, they propose to pay the balance of the water supply subscription fund which is about Rs 3,000/- (Vide para 2 supra) and request that the Government may be pleased to sanction the entire remaining cost of the scheme out of Town Water Supply Grants This has been included in the proposals sent up to Government by this Office for Town Water Supply Grants wherein a grant of Rs 8000/- has been recommended The maintenance charges of water supply will be met by the Municipality.

6 The original estimate of Rs 14,740/- included the cost of sinking bore wells and the public of Anekal were hoping to have the scheme completed with the help of Government and paid their quota of cost by raising subcriptions as stated above But now, the cost of distribution scheme has come to more than Rs 18,000/- apart from the cost of sinking the bore wells In these circumstances the resolution of the Municipal Council deserves sympathetic consideration I, therefore, request that sanction of Government may be kindly obtained to the enclosed estimate for Rs 18,338/- and to the grant of Rs 15,000/- out of the Town Water Supply Grants for 42-43 as a special case As the prices of materials may go up still higher, resulting in the enhancement of the present estimated

cost, I request that early orders of Government may be kindly obtained in the matter

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY COMMISSIONER,
Bangalore District

VSR/-5

Re Water supply to Anekal Town

(1)

With reference to your letter No 3720/35-36 dated 17th April 1942 to the Director of Public Health in Mysore, Bangalore regarding the above, I have the honour to state that a comprehensive scheme providing for the requirements suggested in the resolution of the Municipal Council of the town will be of prohibitive cost, considering the abnormal rise of the cost of materials, especially G I. pipes and fittings A modest scheme, providing for minimum requirements and within limits of practicability for being financed and executed is prepared for Rs 18,338/- and is forwarded herewith for favour of further action I discussed this scheme personally with you last week and you were in agreement to push through this part scheme for the time being considering the present war situation

xxx xxx xxx

Copy of letter No C2-3720/35-36 dated 26th December 1936 from the Deputy Commissioner, Bangalore District, to the Secretary to Government, ~~xxxxDepartmentxxxxx~~ Development Department, Bangalore

(2)

--

I have the honour to forward herewith the file of correspondence ending with Bangalore Sub Division Officer's Memo No B3-779/36-37 dated 15-12-1936 regarding the water supply scheme for Anekal Town and to state that the Municipal Council have resolved in their Meeting held on 27-11-1936 that early sanction of Government may be obtained for the scheme

It is seen from the report of the President that a borewell at a cost of Rs 1000/- was sunk and that it was a failure A second Bore-well at a cost of Rs 1000/- is being sunk in a suitable locality and a good supply of water is expected As per Government Order No D 10729-47-1/I & C 28-3-36 Government have to bear half the expenditure whenever the Bore-well fails In the light of the above Government order, the President made a reference to the Sanitary Engineer who intimated the President that Rs 500/- may be deposited towards the expenditure to be incurred for the second bore-well Altogether a sum of Rs 1,500/- has been spent by the Municipality towards the Bore-wells

The total estimated cost of the scheme is Rs 14,740/- in inclusive of the cost of the Borewells as per estimate enclosed in the records The Municipality has to pay Rs 7,370/- towards its quot for this purpose the Municipal Council have raised a subscription of Rs 6,413-8-0 and have paid Rs 1500/- out of it towards the borewells, leaving a balance of Rs 4,913-8-0 The President reports that the Co-operative Society of Anekal have resolved at their last annual general meeting to give a contribution of Rs 750/- and that the other promised contributions amount to another Rs 1000/- The Municipality does not therefore find it difficult to make up their quota

Regarding the recurring expenditure, the President reports that it may come up to Rs 600/- and that the Sanitary Engineer has stated that it can be reduced to Rs 500/- per annum this amount can be met by the Municipality as the Municipal Council have resolved to levy a water tax The income of the Municipality has also increaded by Rs 305-8-0 due to revision of Mohataria

The supply of good drining water to the public of this town is an urgent necessity, and the readiness with which the citizens have come forward with subscriptions towards

the cost of the water supply scheme, speaks a great deal about th present difficulty for water and of their public spirit

The resolution of the Municipal Council requesting that the Government may be pleased to sanction the estimate and to direct that the work may be taken up very early is enclosed for favour of information. In the circumstances, I request you to be so good as to obtain the very early sanction of Government to this scheme

C. [illegible] Esq., B.A., B.L.,
Secretary to Government,
Law Department, Bangalore.

Sir,

Subject: Water supply scheme to Anekal Town-
forwards revised estimate for sanction

With reference to your letter No. A 6743-Al. 70-41-8 dated 4-2-1942 on the above subject, I have the honour to state as follows:

2. An estimate for Rs 14710/- was prepared during the year 1935-36 for the supply of water to Anekal Town mears of borewells. The estimated cost included the cost of sinking bore wells. The public were very eager to have the facilities of protected water supply scheme to their town. As the Municipality was not capable of financing the scheme, public subscriptionsxwere raised as a result of which a sum of Rs 7745-2-6 was collected five bore wells were sunk by the Sanitary Engineer Department of which 3 are yielding a good supply viz., 630,780, and 1200 gallons per hour respectively a sum of Rupees four thousand and odd was spent sinking these bore wells out of the public subscriptions raised. A recommendation was made to Government office letter of even number dated 18-12-1935 for the sanction of the scheme by granting Rs

estimated cost out of the Town Water Supply Grants Since the public have readily responded and collected the remaining half of the estimated cost. The connected estimate and plan had also been sent along with letter quoted above. No orders were passed on this recommendation till now and the water supply question is at a standstill The bore wells sunk at a heavy cost were thus left without operations.

3. The Municipality requested for a grant from Government to push through the scheme and this item was being included every year under the proposals for Town Water Supply Grants. During the year 1940-41, the Sanitary Engineer intimated that the estimated cost for completion of the water supply scheme might come to more than Rs 50,000/- due to the abnormal rise in the prices of materials on account of war conditions No further action could be taken on account of this prohibitive cost of the scheme The public were however repeatedly asking for the fulfilment of water supply scheme for which they had liberally contributed.

4. After protracted correspondence, the Sanitary Engineer has now sent up an estimate for Rs 18,338/- for a modest scheme of watersupply. This scheme provides for installing a deep well pump to the second bore well to pump water to a suction well near the next bore well A temporary masonry reservoir of 7500 gallons capacity is proposed to be constructed from where water is proposed to be supplied through 6 public taps constructed nearby The detailed estimates, report, plans and the copy of the Sanitary Engineer letter No. 225 dated 14-8-1942 are herein enclosed for favour of reference. The Municipal Council at first resolved at their meeting held on 5-1-42 that it was no good installing few taps near the overhead tank itself, and requested for the supply of water by means of taps through pipes in the brick parts of the town. But the Sanitary Engineer opines ~~xxxxxx~~ that a proper scheme with 10 taps to command the

several localities of the town would cost not less than Rs 30,000/- at the present abnormal rates of prices of the materials and particularly galvanised iron pipes. Should if the opinion of the municipal council is to prevail, there will be no chance of taking up the scheme in the near future on account of its prohibitive costs. The sanitary engineer further states that the present scheme of taken up would serve as a foundation for future improvements when better conditions prevail.

3. The municipal Council were suitably advised and they have resolved at their sitting held on 27-6-942 that the present scheme may be taken up. Regarding the cost, they propose to pay the balance of the water supply subscription fund which is about Rs 3,000/- (vide para 2 supra) and request that the Government may be pleased to sanction the entire remaining cost of the scheme out of town rates. Separately a proposal has been included in the town estimates to be submitted to Government by the Office for town water supply for new wells wherein a grant of Rs 6000/- has been recommended. And a maintenance charges of water supply will be met by the Municipality.

4. As the original estimate of Rs 11,740/- included the cost of sinking two wells and the public of Nekal were hoping to have the scheme completed with the help of Government and paid their quota of cost by raising subscriptions as stated above. But now, the cost of distribution alone has come to more than Rs 18,000/- apart from the cost of sinking the bore wells. In these circumstances the position of the municipal Council deserves sympathetic consideration. I, therefore, request that sanction of Government may be kindly obtained to the enclosed estimate for Rs 18,000/- and to the grant of Rs 15,000/- out of the Town water supply grants for 1942-43 as a special case. As the prices of materials may go up still higher, resulting in the enhancement of the present estimated

cases. I request that early orders of Government may be kindly obtained in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY COMMISSIONER
Trichinopoly District.

VSRV-b.

SIR

Subject — Water supply scheme to Anekal Town

With reference to your letter No L 6260 dated 22-12-1942 enquiring if the Anekal Town Municipal Council is agreeable to raise from Government a loan of Rs 6000/- towards its share of cost of the revised estimate in respect of the above scheme, I have the honour to state that the Amildar President of the Municipality reports that the Municipal Council have resolved at their meeting held on 9-2-1943 (~~flag s~~') that the Municipality is not in a position to raise loan from Government and that therefore the scheme may be dropped for the present A copy of the resolution is enclosed for favour of reference

32 In these circumstances, the sanction of an outright grant o Rs 15,000/- as a special case seems to be the only way of working out the scheme as re orted in this office detailed letter of even number dated 12-9-1942 ( ), with a view to give relief to the people in the locality Otherwise, the scheme will have to be dropped for the present

I have the honour to be,
S i r,
Your most obedient servant,

Deputy Commissioner,
Bangalore District
